## Car Rental Facilities Entering Final Months of Construction

Walls are rising and concrete is flowing as the car rental facility continues to be the main construction focus of the Salt Lake City Department of Airports' Terminal Redevelopment Program (TRP).

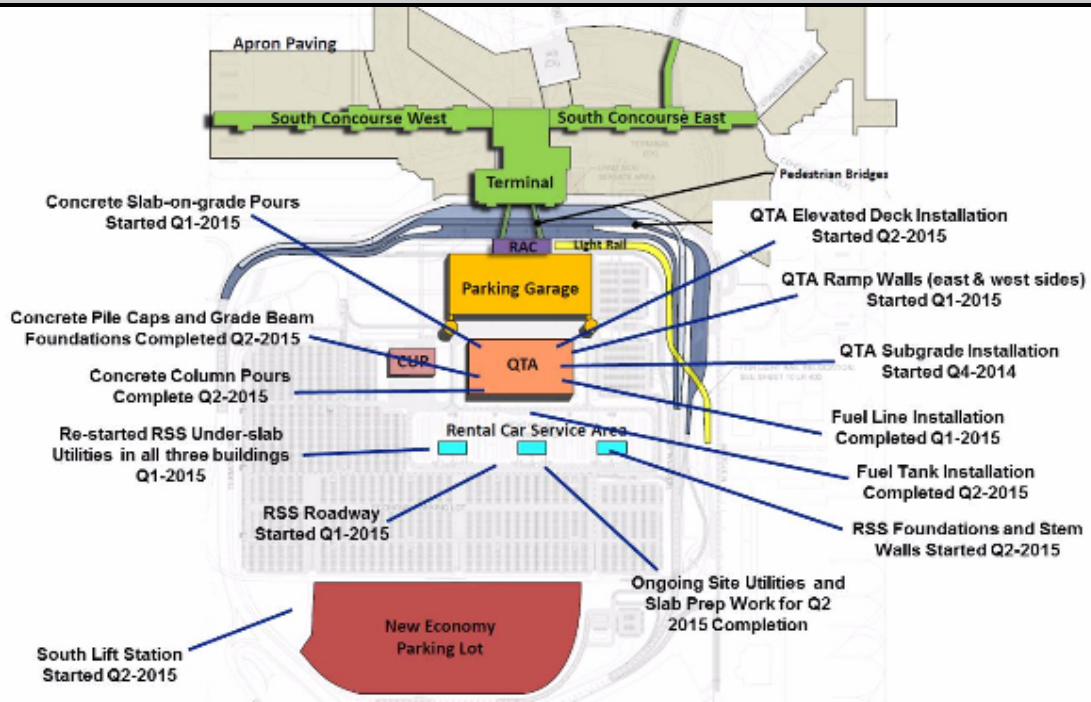

Ten car rental brands will populate the new facility including the Quick-Turn-Around (QTA) building and Rental Car Service Site (RSS) which are anticipated to open in February 2016. The customer service desks will remain in the parking garage until the gateway building is completed in conjunction with the

#### Project Scope:

- 19,000 cubic yards of concrete.
- 2,700,000 pounds of reinforcing steel.
- 4,000 stone columns (to form a ground improvement foundation system).
- 125,000 cement masonry unit blocks for wall construction.
- Four 100 ton crawler cranes were used to install the stone columns.
- Two 100 ton crawler cranes are on site for the current concrete construction.
- About 151 workers are on site daily representing a variety of construction trades.

Overall Program Construction & Paving Sequence

## Design Process

The design process is getting into final details including the selection of finish materials and gathering granular input from user groups on room data sheets.

The design team issued the next construction drawing package for utility relocation, temporary roads and site work for major construction activity that will begin in 2016
