

# Salt Lake International Airport

## Southern Infrastructure Improvement Project

### Hazardous Materials Technical Memorandum

Prepared for: Salt Lake International Airport  
Prepared by: Buffie Chournos and Staci Hill, PE, HNTB  
Date: March 6, 2024

## 1.0 INTRODUCTION

This Hazardous Materials Technical Memorandum has been prepared in support of the Salt Lake City (SLC) International Airport (SLCIA) Southern Infrastructure Improvement Project Environmental Assessment (EA). The SLCIA is located in Salt Lake County, approximately 5 miles northwest of downtown SLC and is generally bounded by Interstate-80 (I-80) to the south, the International Center and undeveloped land and wetlands to the west, additional undeveloped land and wetlands to the north, and Interstate 215 (I-215) and light industrial or commercial property to the east. The EA Project Area (limits of construction encompassing the Project) is located in the southern extent of the Airport campus and includes the Surplus Canal, Northpoint Canal, and the location of the former Wingpointe Golf Course. **Figure 1** shows the airport location. **Figure 2** shows the Project Area.

The purpose of this technical memorandum is to identify known hazardous materials and contaminated sites within the Project Area and to evaluate potential impacts that could result from implementation of the Southern Infrastructure Improvement Project (Proposed Action). Information in this report provides an overview of the regulatory context, methods used to identify existing resources, potentially affected resources identified within the Project Area, and potential impacts to hazardous materials and contaminated sites associated with the implementation of the Proposed Action. The findings of this technical memorandum support the impact assessment of the Proposed Action under the National Environmental Policy Act (NEPA).

Included as **Attachment A**, the Environmental Data Resources, Inc. (EDR) Radius Map Report shows the EDR ID locations within the search radius, the Project Area, and the search radius boundary.

## 2.0 PROJECT DESCRIPTION

### 2.1 Project Area

The Project Area includes approximately 280 acres north of I-80 west, and south of the Airport, which was previously the Wingpointe Golf Course. This golf course was constructed on the remnants of a landfill, with topsoil and fill material brought in from adjacent properties to cover the landfill. The Jordan Surplus Canal and North Point Canal Conveyance System, both humanmade canals, run through the Project Area, and discharge into the wetlands surrounding the Great Salt Lake and Farmington Bay. Security fences were installed in the early 2000s, which cross through the delineation area in multiple

locations, but do not alter any surface water flows. Both the canals and previous golf course design create a varied landscape with many hills, depressions, and ponds.

Potential direct impacts to resources have been calculated using a conceptual level of design of the Proposed Action. As design progresses, measures may be taken to avoid and minimize impacts to environmental resources to the maximum extent practicable. At this time, it is not possible to anticipate the exact locations of each proposed activity; impacts outside of the existing Study Area will be reviewed and documented through future NEPA reevaluations.

## 2.2 Proposed Action

The Proposed Action includes the following projects (see Error! Reference source not found.):

- Construction of the SEAT
- Construction of the South Employee Parking Area, Employee Screening Facility and Bus Facility

The connected actions required to implement the Proposed Action include relocation of the Surplus and North Point canals; construction of a stormwater detention pond, stormwater pump station, and sewer lift station; relocation of North Temple alignment and salt storage facility; and relocation of the Automated Surface Observing System (ASOS) and Remote Transmitter/Receiver (RTR).

## 3.0 METHODOLOGY

The following discussion presents a summary of the methodology used to complete this assessment. The identification of sites of concern was based on the combination of the methods of analysis.

### 3.1 Physical Site Inspection

Site reconnaissance was performed to verify current site conditions and identify potential environmental concerns. HNTB drove and inspected the former areas of the Wingpointe Golf Course and areas about the Surplus Canal.

### 3.2 Historical Information

The objective of reviewing historical documentation is to develop a history of previous land uses in the Project Area. The historic information is used to assess the potential for hazardous materials that may constitute a Recognized Environmental Condition (REC) associated with historic land uses within and near the Project Area. For purposes of this analysis, the history of the Project Area is based on a review of the information from the historical resources including historical aerial photographs, historic topographic maps, geological maps, and historic land use maps.

### 3.3 Records Review

EDR conducted a review of state and federal databases within the Project Area and compiled the results in an EDR Radius Map Report (EDR 2023).<sup>1</sup> The search area used for the review encompasses the Project

---

<sup>1</sup> EDR (Environmental Database Report). 2023. EDR Radius Map Report. Salt Lake International Airport. Inquiry Number: 7509558.2s. November 30, 2023.

Area and a 1-mile buffer surrounding the Project Area. The EDR Radius Map Report and associated database results are included as **Appendix A**.

Additionally, the Utah Department of Environmental Quality (UDEQ) Interactive Map<sup>2</sup> with listed sites and associated database listings was reviewed and included in the results in **Table 1**.

### 3.4 Per-and Polyfluoroalkyl Substances

Per-and polyfluoroalkyl substances (PFAS) are a group of chemicals used to make fluoropolymer coatings and products that resist heat, oil, stains, grease, and water. PFAS contamination involves persistent organic compounds with properties that make many of them toxic and persistent in the environment. Since the 1940s, PFAS have been manufactured and used in a variety of industries and for items including adhesives, fire-fighting foams, and water repellants. PFAS can enter the environment from multiple sources, and because they tend to break down very slowly in the environment, PFAS can end up in the water sources that many communities rely on for drinking water. Exposure to PFAS over a long time, and during certain critical life stages, like during pregnancy and in developing babies, may lead to negative health effects. The possibility of the presence of PFAS within the Project Area and vicinity was reviewed as part of this assessment.

### 3.5 Risk Ranking Criteria

The sites of concern identified from the physical, historical, and records reviews (see **Table 1**) were ranked as having a **Low**, **Moderate**, or **High** potential to find hazardous material within the Project Area.

#### 3.5.1 Low Risk

This risk level identifies sites of concern where the likelihood for the project to encounter RECs<sup>3</sup> is low due to lack of evidence to suggest that soil and/or groundwater from the site of concern is impacted, or the contamination from off-site migration is not expected to impact the proposed Project Area during construction. Low-risk sites may also include potentially contaminated sites where remediation has previously occurred, but limited excavation is anticipated near the site, and/or disposal of excavated soils or groundwater is considered relatively straightforward.

---

<sup>2</sup> UDEQ (Utah Department of Environmental Quality). UDEQ Interactive Map database search. Accessed March 2024. Available at: <https://enviro.deq.utah.gov/>.

<sup>3</sup> The term Recognized Environmental Condition is defined in American Society for Testing and Materials (ASTM) E1527-21 as (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include de minimis conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis are not recognized environmental conditions.

### 3.5.2 Moderate Risk

This risk level identifies sites of concern where the likelihood for the project to encounter a REC is moderate because of the type or extent of contaminant, and groundwater from the site of concern is impacted and has a reasonable potential to impact the Project from off-site migration, but there is no conclusive evidence that a REC exists. Moderate risk sites may also have the potential to be contaminated, but remediation of contamination, if present, is considered relatively straightforward.

### 3.5.3 High Risk

This risk level identifies sites of concern where the likelihood for Project activity to encounter a REC is high, contamination is known to be extensive, and conclusive evidence has indicated that the REC has directly impacted the Project. Sites may also have a high risk if one or more existing or historic contamination sources is located within the Project Area.

## 4.0 RESULTS AND CONCLUSIONS

### 4.1 Physical Site Inspection

HNTB completed a physical site inspection of the Project Area and additionally reviewed the area using Google Earth and a review of aerial photographs showing the area and surrounding vicinity.

### 4.2 Historical Information

Review of historic information for the Project Area, Airport, and surrounding area are provided the following paragraphs.

The following historic aerial photographs were reviewed using Google Earth Imagery and Historic Aerials (years 1950, 1958, 1965, 1971, 1977, 1981, 1994, 1998, 2004, 2009, 2014, 2018, and 2022):

- **1950:** The aerial shows the Surplus Canal traversing northwesterly through the Project Area and an additional canal running north-south through the area. North Temple is shown traversing east-west across the northern portion of the Project Area with what appears to be a railroad also traversing east-west to the south of North Temple. A canal traverses east-west along the southern boundary of the Project Area and what appears to be a structure, two outbuildings, and an access road off of a main road in the southeast corner of the Project Area.
- **1958:** The area about the Project Area is similar in nature to the 1950 aerial with the exception of a residence to the south of North Temple in the Project Area, and the structures in the southeast corner appear to have expanded and what appears like irrigation fields to the west of the structures are present. The airport to the north has runways and infrastructure constructed.
- **1965 and 1971:** The Project Area is similar to the 1958 aerial photograph. The development of the airport to the north has expanded.
- **1977:** The aerial photograph shows Surplus Canal traversing northwest through the Project Area and a canal traversing north-south through the western portion of the site that turns east-west in the southern portion. North Temple is traversing east-west through the northern portion of

the Project Area with remnants of the former railroad line to the south. A residence is still visible to the south of North Temple but the structures in the southeast portion of the site appear to have been removed and remnants of foundations and buildings. The access road and main road are still present.

- **1981:** The area looks similar to the 1977 aerial photograph with the exception of the airport to the north has expanded extensively and the Surplus Canal has been relocated to the northwest of the Project Area to run easterly then turn north along the boundary of the airport. Additionally, portions of I-80 have been constructed to the south of the Project area.
- **1994, 1998, and 2004:** The Project Area is developed as a golf course with visible ponds, sand, greens, and cart paths. A building likely used as the golf course clubhouse is noted in the northeastern portion of the Project Area. I-80 borders the site to the south and west with portions of the golf course beyond the interchange to the airport. The Surplus Canal traverses the eastern boundary of the site, and an additional canal runs east-west along the southern border of the Project Area. North Temple and the railroad have been removed from the site. The southeast portion of the property is undeveloped with remnants of previous buildings observed.
- **2009 and 2014:** The Project Area appears similar to the previous aerial photographs. Additional parking areas have been developed to the north of Project Area on the Airport and a barrier/runway extension has been developed to the east of the canal. By 2014, a light rail line adjacent to the southern and western borders of the Project Area had been developed.
- **2018:** The Project Area and surrounding area appear similar to the previous aerial photographs, with the exception of the golf course, which appears overgrown and no longer in use.
- **2022:** The Project Area and surrounding area appear similar to the previous aerial photograph, with the addition of development to the northeast of the Project Area.

The following topographic maps covering the project area were obtained by EDR (years 1951, 1963, 1972, 1975, 1997, 2014, 2017, and 2020):

- **1951:** The topographic map shows the Project Area with the Surplus Canal traversing northeasterly through the eastern portion, North Temple traversing east-west through the northern portion with a residence depicted to the south and north, railroad tracks traversing east-west through the central portion, the North Pointe Consolidated Canal traversing north-south through the central and southern portion, and a structure and access road in the southeastern portion. "Municipal Airport No. 1" is depicted to the northeast of the site, railroad tracks to the south, and undeveloped land to the north and east with Goggin Drain beyond.
- **1963 and 1972:** The area about the Project Area is similar in nature to the 1951 topographic map with the addition of Gladiola Street traversing the eastern portion to North Temple. Additional structures have been added to the southeastern portion of the Project Area. The SLC Municipal Airport is depicted to the north with expanded areas to the east and west.
- **1975:** The topographic map depicts the Project Area similar to the previous topographic maps with the addition of a structure along the canal in the southern portion. The area to the east of

the Project is depicted with a new road and structures and the airport to the north has additional structures and labeled as the SLCIA.

- **1997:** The topographic map depicts the Project Area as being occupied by the Wingpointe Golf Course with noted ponds. North Temple and the railroad tracks have been removed from the Project Area. I-80 off-ramp traverses to the west of the Project Area with the Surplus Canal traversing northeasterly along the eastern portion of the site and portions of the Northpointe Canal along the southern portion with I-80 beyond. The Airport to the north has expanded with several buildings and infrastructure to the west with the Surplus Canal being relocated to border the west side of the Airport.
- **2014, 2017, 2020:** The topographic map depicts I-80, the off-ramp, the canals, ponds on the Project Area, and the Airport and runways to the north. No specific depicted structures within the surrounding area are shown.

Additional historic review of the Project Area, Airport, and surrounding area provided the following information:

- The Jordan Surplus Canal was originally constructed in 1862 (without levees) as a flood control project. It was created by diverting a portion of water from the Jordan river.
- The Surplus Canal was used to provide quicker access from a stone quarry at the mouth of Little Cottonwood Canyon to the Salt Lake City Temple. Additionally, the diversion helped to provide water, for agricultural use, to the inner areas of Salt Lake County.
- The Utah Western Pacific Railroad was built in 1869 and extended east to west across the Project Area.
- The SLCIA, which is north of the Project Area, was constructed in 1911.
- In 1960, the Surplus Canal was enlarged to divert most of the Jordan River north of 2100 South Street in SLC and convey the water to the Great Salt Lake through a more direct route than the Jordan River. At this time, the Surplus Canals right and left banks levee systems were constructed.
- To accommodate runway expansion at the Airport, the Surplus Canal was relocated to the west in 1983 and the early 1990's. The Surplus Canal is still used for irrigation and storm water overflow purposes across Salt Lake County. The canal acts as overflow for the creeks in Parleys, Emigration, and Red Butte Canyon.
- The Wingpointe Golf Course was constructed in 1990 and operated on the project area from 1990 until 2015, when it was closed, and the land returned to the Salt Lake City Department of Airports. Golf course greens, ponds, foundations, and roads remain, though overgrown by native weeds and vegetation. To accommodate enough space for parking and the golf course, North Temple Road was terminated to the east of the Project Area.

Based on historical research, one site/area of concern was identified: The Utah Western Pacific Railroad operated within the Project Area from approximately 1869 to the 1950s with the tracks remaining in place until the late 1970s. Potential contaminants of concern include petroleum products, polycyclic

aromatic hydrocarbon (PAHs), and metals. Additionally, remnants of tracks could be discovered during the construction of the Project. This site is a **Moderate** risk to the Project.

#### 4.3 Records Review

The following discussion provides a summary of the EDR Radius Report<sup>1</sup> and identifies general areas where hazardous materials and/or soil contamination may be present. Sites that were listed as downgradient, located outside the Project Area or in a position where impacts would not affect the Project Area, are not included in this discussion.

EDR identified 32 sites in all databases searched, as well as an additional 14 orphan sites within the search radius of the Project. The orphan sites could not be mapped due to lack of adequate address information. The specific locations were determined where possible.

No National Priority List, Federal Engineering, or Institutional Control sites were identified within the EDR specified search area. The most common type of sites listed in the EDR Radius Report includes underground storage tanks (UST), leaking underground storage tanks (LUST), and the Federal Defense and the Resource Conservation and Recovery Act (RCRA) listings. The EDR Radius Map Report<sup>1</sup> and associated database results are included as **Appendix A**.

Sites of Potential Environmental Concern and the associated risk ranking reviewed in the EDR Radius Map Report<sup>1</sup> and reviewed on the UDEQ Interactive Map<sup>2</sup> are described in **Table 1**. The table displays information pertaining to each site's identification, property address, the database(s) in which the site is listed, location within or approximate distance from the Project Area, and a brief description of the reason(s) the site is categorized as a **Low**, **Moderate**, or **High** risk. EDR identifies several duplicate sites with slightly different names or address information; these were consolidated in **Table 1**.

#### 4.4 PFAS

In December of 2019, the Environmental Protection Agency (EPA) issued recommendations for addressing PFAS contamination in groundwater. In March of 2023, EPA released a *Proposal to Limit PFAS in Drinking Water* memorandum that proposed a nationwide enforceable Maximum Contaminant Level of 4 parts per trillion. The EPA also proposed placing an enforceable limit on mixtures containing the six commonly used PFAS chemicals (EPA 2023).<sup>4</sup>

The Surplus Canal has been sampled upstream of the airport campus, and there is detectable per- and polyfluoroalkyl substances (PFAS) in the water. Potential PFAS contamination areas on the airport campus are currently being evaluated. Sample data is not yet available to determine whether PFAS is a contaminant of concern in the Project Area.

#### 4.5 Summary And Conclusions

Based on historical research, the former presence of a railroad line, adjacent USTs, emergency generator tanks, fueling operations, and adjacent general airport use from 1911 to the present would create a **Moderate** potential to encounter hazardous materials and contaminants of concern including

---

<sup>4</sup> EPA (Environmental Protection Agency). 2023. *Proposal to Limit PFAS in Drinking Water* Fact Sheet. March 2023. Available at: [https://www.epa.gov/system/files/documents/2023-04/Fact%20Sheet\\_PFAS\\_NPWDR\\_Final\\_4.4.23.pdf](https://www.epa.gov/system/files/documents/2023-04/Fact%20Sheet_PFAS_NPWDR_Final_4.4.23.pdf).

petroleum products, volatile organic compounds (VOCs), and metals. Areas of concern for the Project Area are shown on **Figure 3**.

Information reviewed in the EDR Radius Report<sup>1</sup> and the UDEQ Interactive Map<sup>2</sup> does not indicate areas within the Project Area that have soil and/or groundwater contamination. Several areas within proximity of the Project Area show soil and groundwater contamination. Contaminants of concern include diesel fuel, gasoline, VOCs, and metals.

Project construction could adversely impact the environment if contaminated soils and groundwater are encountered and not properly managed and are allowed to spread to clean soil, surface water, or groundwater. Prior to the Project construction, a Contaminated Soil and Groundwater Management Plan should be prepared and include any Airport best management practices (BMP) identified. Additionally, as a BMP, a Health and Safety Plan will be in place and followed throughout the Project.

As a BMP, Special Provisions would be added to the construction contract to inform the contractor of the potential for anticipated and unanticipated hazardous materials.

Prior to any demolition activities of structures, SLCIA is obligated to engage a certified Asbestos Hazard Emergency Response Act and Utah Occupational Safety and Health Administration or Act (OSHA) Certified Building Inspector to conduct an asbestos Good Faith Survey on the existing structures associated with the Project to identify any asbestos containing materials (ACMs). If ACMs are discovered, mitigation would consist of removing those materials in compliance with regulations prior to structure demolition.

## 5.0 LIMITATIONS

The conclusions described in this technical memorandum are based on research of available materials within the time frame of this assessment. The information presented is relevant to the date of document review.

This assessment has been conducted in accordance with current regulatory guidelines and the standard of care exercised by environmental consultants performing similar work in the Project Area. No warranty, expressed or implied, is made regarding the professional opinions present in this technical memorandum.

This assessment is not a comprehensive site characterization and should not be construed as such. This study did not include an evaluation of geotechnical conditions or potential geologic hazards. Beyond the site inspection, historical information, and records review described previously, this technical memorandum does not include analysis of the following: human health risk, asbestos-containing materials, methane gas, radon, lead-based paint, lead in drinking water, wetlands, regulatory compliance, cultural and historic resources, mold, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality including vapor intrusion, pipelines, and high-voltage power lines.

This document is intended to be used only in its entirety. No portion of the document, by itself, is designed to completely represent any aspect of the project described herein. If additional information becomes available, HNTB requests the opportunity to review the information and modify our findings, if necessary.

HNTB cannot warrant or guarantee that not finding indicators of any particular hazardous material means that this particular hazardous material or any other hazardous materials do not exist on the site. Additional research, including invasive testing, can reduce the uncertainty, but no techniques commonly employed can eliminate the uncertainty altogether.

## TABLES

Table 1. Sites of Potential Environmental Concern

| SITE NAME (as listed in EDR Report <sup>1</sup> or UDEQ Database <sup>2</sup> ) | LISTED ADDRESS             | DATABASE(S)                   | DISTANCE FROM PROJECT AREA                                  | DESCRIPTION/POTENTIAL CONCERN   | IMPACT RISK |
|---|----------------------------|-------------------------------|---|---|-------------|
| 4000 W. Lift Station Upgrade  | 130 North 3700 West        | ECHO, FINDS, NPDES            | Roughly 200 feet east of the Proposed Action                | The listings for the lift station show the facility has current permits and no violations associated with the permits.  | Low         |
| Avis Rent A Car   | 3781 Terminal Drive #22186 | FINDS, LUST, UST, SPILLS      | Approximately 0.46-mile to the north of the Proposed Action | <p>The Avis Rent A Car facility at one time contained a 12,000-gallon gasoline tank installed in 1986, a 500-gallon used oil tank installed in 1986, a 550-gallon used oil tank installed in 1987, and a 550-gallon new oil tank installed in 1987. The former tanks are listed as being removed from the ground in 1993. At that time, a release of petroleum from the USTs was identified to have impacted soils and groundwater. Groundwater was identified to be to the northwest in a down-gradient position of the Project Area. Remediation was completed at the site showing contamination levels to be below the Tier 1 screening levels and to the satisfaction of the UDEQ. The facility was given a No Further Action letter in 1999 requiring no further remediation.</p> <p>The SPILLS listing indicated that a spill was reported in 2015 based on subsurface sampling that detected concentrations of gasoline range organics in groundwater. Further sampling indicated the concentrations were below the Tier 1 screening levels. The tanks were removed in 2016. .</p> | Low         |
| Federal Express Corporation   | 220 North 3700 West        | LUST, UST, RCRA Non-Generator | 450 feet to the north of the Proposed Action                | The facility at one time contained a 4,000-gallon gasoline tank installed in 1986 and a 10,000-gallon diesel tank installed in 1986. Both tanks were removed from the ground in 2004. During the removal, free phase petroleum product was discovered in two wells surrounding the two USTs. Nine monitoring wells were installed, and sampling events were conducted from 2005 to 2007. Over excavation of the contaminated UST basin occurred in 2008. Following the excavation activities, two groundwater monitoring events were conducted that showed petroleum hydrocarbon contamination below the Tier 1 Screening Levels. Remediation was completed at the site showing contamination levels to be below the Tier 1 screening levels and to the satisfaction of the UDEQ. The facility was given a No Further Action letter in 2010 requiring no further remediation.   | Low         |
| FAA-SLC GS E/G  | Runway 34 SLCIA            | LUST, UST, and AST            | 350 feet to the north of the Proposed Action                | The area contained at one time a 515-gallon diesel tank installed in 1977 and removed in 1998. A LUST was opened for the facility in 1998 due to contamination noted during the removal of the tank. It was given closure in 1999. The AST listing indicates that the facility contains an aboveground tank consisting of a 500-gallon diesel tank currently in use.  | Moderate    |
| FAA-Salt Lake City LOC E/G  | Runway 16 SLCIA            | LUST, UST, and AST            | Roughly 1,000 feet to the north of the Proposed Action      | The area contained at one time a 515-gallon diesel tank installed in 1971 and removed in 1998. The area also contains a 500-gallon AST currently in use. The LUST listing shows a release that was reported in 1998 and given closure in 2000.  | Low         |
| FAA – Salt Lake City ALS 34 / FAA Salt Lake City MM E/G                         | South Runway 34 SLCIA      | LUST and UST                  | Roughly 350 feet to the north of the Proposed Action        | The area contained at one time a 2,000-gallon diesel tank installed in 1990 and removed in 2020. A LUST was reported for the area in 2020 and appears to have not been closed. No additional information was found on the UDEQ website.   | Moderate    |

| SITE NAME (as listed in EDR Report <sup>1</sup> or UDEQ Database <sup>2</sup> ) | LISTED ADDRESS                           | DATABASE(S) | DISTANCE FROM PROJECT AREA   | DESCRIPTION/POTENTIAL CONCERN  | IMPACT RISK |
|---|--|-------------|--|--|-------------|
| FAA Salt Lake City RTR – B E/G  | South of Runway 34                       | AST         | Located within the Project Area as part of the RTR tower that will be moved as part of the Proposed Action | The RTR facility has a generator that is fed by a reported 500-gallon diesel AST. The tank is double walled and contained within the fenced facility of the RTR.   | Moderate    |
| South Electrical Vault  | Runway 14/32 South Perimeter Road, SLCIA | UST         | Adjacent to the northeast to the Proposed Action   | The vault includes a 6,000-gallon diesel tank that feeds an emergency backup generator. The UST is routinely inspected and has not been listed with a release since installation in 1997. The tanks is also listed as double-walled. | Moderate    |

Notes:

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### TARGET PROPERTY INFORMATION

#### ADDRESS

SALT LAKE CITY INTERNATIONAL AIRPORT  
SALT LAKE CITY, UT 84104

#### COORDINATES

Latitude (North): 40.7690580 - 40° 46' 8.60"  
Longitude (West): 111.9791990 - 111° 58' 45.11"

## EXECUTIVE SUMMARY

### **TARGET PROPERTY SEARCH RESULTS**

The target property was not listed in any of the databases searched by EDR.

### **DATABASES WITH NO MAPPED SITES**

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

### **STANDARD ENVIRONMENTAL RECORDS**

#### ***Lists of Federal NPL (Superfund) sites***

NPL..... National Priority List  
Proposed NPL..... Proposed National Priority List Sites  
NPL LIENS..... Federal Superfund Liens

#### ***Lists of Federal Delisted NPL sites***

Delisted NPL..... National Priority List Deletions

#### ***Lists of Federal sites subject to CERCLA removals and CERCLA orders***

FEDERAL FACILITY..... Federal Facility Site Information listing  
SEMS..... Superfund Enterprise Management System

#### ***Lists of Federal CERCLA sites with NFRAP***

SEMS-ARCHIVE..... Superfund Enterprise Management System Archive

#### ***Lists of Federal RCRA facilities undergoing Corrective Action***

CORRACTS..... Corrective Action Report

#### ***Lists of Federal RCRA TSD facilities***

RCRA-TSDF..... RCRA - Treatment, Storage and Disposal

#### ***Lists of Federal RCRA generators***

RCRA-LQG..... RCRA - Large Quantity Generators  
RCRA-SQG..... RCRA - Small Quantity Generators  
RCRA-VSQG..... RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

#### ***Federal institutional controls / engineering controls registries***

LUCIS..... Land Use Control Information System

## EXECUTIVE SUMMARY

US ENG CONTROLS..... Engineering Controls Sites List  
US INST CONTROLS..... Institutional Controls Sites List

### ***Federal ERNS list***

ERNS..... Emergency Response Notification System

### ***Lists of state- and tribal hazardous waste facilities***

SHWS..... This state does not maintain a SHWS list. See the Federal CERCLIS list and Federal NPL list.

### ***Lists of state and tribal leaking storage tanks***

LAST..... Leaking Aboveground Storage Tank Sites  
INDIAN LUST..... Leaking Underground Storage Tanks on Indian Land

### ***Lists of state and tribal registered storage tanks***

FEMA UST..... Underground Storage Tank Listing  
AST..... Listing of Aboveground Storage Tanks  
INDIAN UST..... Underground Storage Tanks on Indian Land

### ***State and tribal institutional control / engineering control registries***

INST CONTROL..... Sites with Institutional Controls

### ***Lists of state and tribal voluntary cleanup sites***

VCP..... Voluntary Cleanup Sites List  
INDIAN VCP..... Voluntary Cleanup Priority Listing

### ***Lists of state and tribal brownfield sites***

BROWNFIELDS..... Brownfields Assessment Sites Listing

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### ***Local Brownfield lists***

US BROWNFIELDS..... A Listing of Brownfields Sites

### ***Local Lists of Landfill / Solid Waste Disposal Sites***

INDIAN ODI..... Report on the Status of Open Dumps on Indian Lands  
ODI..... Open Dump Inventory  
DEBRIS REGION 9..... Torres Martinez Reservation Illegal Dump Site Locations  
IHS OPEN DUMPS..... Open Dumps on Indian Land

### ***Local Lists of Hazardous waste / Contaminated Sites***

US HIST CDL..... Delisted National Clandestine Laboratory Register  
CDL..... Methamphetamine Contaminated Properties Listing  
US CDL..... National Clandestine Laboratory Register

## EXECUTIVE SUMMARY

### **Local Land Records**

LIENS 2..... CERCLA Lien Information

### **Records of Emergency Release Reports**

HMIRS..... Hazardous Materials Information Reporting System

SPILLS 90..... SPILLS 90 data from FirstSearch

### **Other Ascertainable Records**

SCRD DRYCLEANERS..... State Coalition for Remediation of Drycleaners Listing

US FIN ASSUR..... Financial Assurance Information

EPA WATCH LIST..... EPA WATCH LIST

2020 COR ACTION..... 2020 Corrective Action Program List

TSCA..... Toxic Substances Control Act

TRIS..... Toxic Chemical Release Inventory System

SSTS..... Section 7 Tracking Systems

ROD..... Records Of Decision

RMP..... Risk Management Plans

RAATS..... RCRA Administrative Action Tracking System

PRP..... Potentially Responsible Parties

PADS..... PCB Activity Database System

ICIS..... Integrated Compliance Information System

FTTS..... FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

MLTS..... Material Licensing Tracking System

COAL ASH DOE..... Steam-Electric Plant Operation Data

COAL ASH EPA..... Coal Combustion Residues Surface Impoundments List

PCB TRANSFORMER..... PCB Transformer Registration Database

RADINFO..... Radiation Information Database

HIST FTTS..... FIFRA/TSCA Tracking System Administrative Case Listing

DOT OPS..... Incident and Accident Data

CONSENT..... Superfund (CERCLA) Consent Decrees

INDIAN RESERV..... Indian Reservations

FUSRAP..... Formerly Utilized Sites Remedial Action Program

UMTRA..... Uranium Mill Tailings Sites

LEAD SMELTERS..... Lead Smelter Sites

US AIRS..... Aerometric Information Retrieval System Facility Subsystem

US MINES..... Mines Master Index File

ABANDONED MINES..... Abandoned Mines

UXO..... Unexploded Ordnance Sites

DOCKET HWC..... Hazardous Waste Compliance Docket Listing

FUELS PROGRAM..... EPA Fuels Program Registered Listing

PFAS NPL..... Superfund Sites with PFAS Detections Information

PFAS FEDERAL SITES..... Federal Sites PFAS Information

PFAS TSCA..... PFAS Manufacture and Imports Information

PFAS RCRA MANIFEST..... PFAS Transfers Identified In the RCRA Database Listing

PFAS ATSDR..... PFAS Contamination Site Location Listing

PFAS WQP..... Ambient Environmental Sampling for PFAS

PFAS NPDES..... Clean Water Act Discharge Monitoring Information

PFAS ECHO..... Facilities in Industries that May Be Handling PFAS Listing

PFAS ECHO FIRE TRAINING..... Facilities in Industries that May Be Handling PFAS Listing

PFAS PART 139 AIRPORT... All Certified Part 139 Airports PFAS Information Listing

| RGA LUST..... | Recovered Government Archive Leaking Underground Storage Tank |

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

#### ***Lists of state and tribal landfills and solid waste disposal facilities***

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Department of Environmental Quality's Landfill Inventory/Closed Solid Waste Land Disposal Sites.

A review of the SWF/LF list, as provided by EDR, and dated 01/13/2023 has revealed that there is 1

## EXECUTIVE SUMMARY

SWF/LF site within approximately 0.5 miles of the target property.

| <u>Equal/Higher Elevation</u>                   | <u>Address</u> | <u>Direction / Distance</u> | <u>Map ID</u> | <u>Page</u> |
|---|----------------|-----------------------------|---------------|-------------|
| WASTE MANAGEMENT-SAL<br>Facility Status: Closed |                | SSE 1/4 - 1/2 (0.449 mi.)   | 18            | 35          |

### ***Lists of state and tribal leaking storage tanks***

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Environmental Quality's Potential Leaking UST Sites.

A review of the LUST list, as provided by EDR, and dated 01/09/2023 has revealed that there are 12 LUST sites within approximately 0.5 miles of the target property.

### ***Lists of state and tribal registered storage tanks***

UST: The Underground Storage Tank database contains a listing of Facility, Owner, Location & Tanks not Closed or Removed. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Quality's Facilities with at Least One Non-exempt Tank.

A review of the UST list, as provided by EDR, and dated 01/09/2023 has revealed that there are 3 UST sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

### Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/06/2023 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

| <u>Lower Elevation</u>                        | <u>Address</u>      | <u>Direction / Distance</u> | <u>Map ID</u> | <u>Page</u> |
|---|---------------------|-----------------------------|---------------|-------------|
| FEDERAL EXPRESS CORP<br>EPA ID:: UTD988066577 | 220 NORTH 3700 WEST | N 0 - 1/8 (0.095 mi.)       | B9            | 17          |

FUDS: The Listing includes locations of Formerly Used Defense Sites Properties where the US Army Corps Of Engineers is actively working or will take necessary cleanup actions.

A review of the FUDS list, as provided by EDR, and dated 02/01/2023 has revealed that there is 1 FUDS site within approximately 1 mile of the target property.

| <u>Equal/Higher Elevation</u> | <u>Address</u> | <u>Direction / Distance</u> | <u>Map ID</u> | <u>Page</u> |
|-------------------------------|----------------|-----------------------------|---------------|-------------|
| SALT LAKE CITY AIR R          |                | NE 1/2 - 1 (0.725 mi.)      | 21            | 39          |

DOD: Consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.

A review of the DOD list, as provided by EDR, and dated 06/07/2021 has revealed that there is 1 DOD site within approximately 1 mile of the target property.

| <u>Equal/Higher Elevation</u> | <u>Address</u> | <u>Direction / Distance</u> | <u>Map ID</u> | <u>Page</u> |

| SALT LAKE CITY IAP            |                | NNE 1/2 - 1 (0.797 mi.)     | 0             | 8           |

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 02/02/2023 has revealed that there are 3 FINDS sites within approximately 0.001 miles of the target property.

Environmental Interest/Information System:

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

**Environmental Interest/Information System:**

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Feature Description: In 1954, the US leased a total of 0.34 of an ac of land from the Salt Lake City Corp. After renovation, the USAir Force used the bldg as an Airmen dormitory for the Radar Bomb Scoring detachments. Chief Master Sergeant Foote, Environmental Coordinator at the Air National Guard installation, stated that the building currently on the property were built in 1942 by the Corp of Engineers and have used as general office space, supply warehouse a publication distribution office ,and an education office. To his knowledge, the buildings have never been used as barracks. Chief Foote stated that the DoD recently conducted a base wide investigation under the subject 0.34 acre property during the IRP investigation.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## **STANDARD ENVIRONMENTAL RECORDS**

### ***Lists of Federal NPL (Superfund) sites***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

### ***Lists of Federal Delisted NPL sites***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/26/2023

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

### ***Lists of Federal CERCLA sites with NFRAP***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

### ***Lists of Federal RCRA TSD facilities***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

### ***Lists of Federal RCRA generators***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

### RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

### **VCP: Voluntary Cleanup Sites List**

The purpose of the program is to encourage the voluntary cleanup of sites where there has been a contaminant release threatening public health and the environment, thereby removing the stigma attached to these sites which blocks economic redevelopment. Voluntary cleanup of these sites will hopefully result in clearing the pathway for returning these properties to beneficial use.

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### ***Local Brownfield lists***

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Data Release Frequency: Varies

### US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

### Other Ascertainable Records

#### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

### EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

### 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

|   | Data Release Frequency: Annually       |

### SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

|   | Data Release Frequency: Annually       |

### RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

| Number of Days to Update: 6             | Next Scheduled EDR Contact: 07/31/2023  |
|   | Data Release Frequency: Varies          |

### RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

### HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Data Release Frequency: Varies

### UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

### US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

Date of Government Version: 10/12/2016

### ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST\_HANDLING\_INSTR), Non-hazardous waste description (NON\_HAZ\_WASTE\_DESCRIPTION), DOT printed information (DOT\_PRINTED\_INFORMATION), Waste line handling instructions (WASTE\_LINE\_HANDLING\_INSTR), Waste residue comments (WASTE\_RESIDUE\_COMMENTS).

### PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

### PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

### PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits.

### PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facility's name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

### PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

### AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

## EDR HIGH RISK HISTORICAL RECORDS

### ***EDR Exclusive Records***

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Data Release Frequency: No Update Planned

#### EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

#### EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

### **OTHER DATABASE(S)**

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

##### **NY MANIFEST: Facility and Manifest Data**

Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSD facility.

Date of Government Version: 01/01/2019  
Date Data Arrived at EDR: 10/29/2021  
Date Made Active in Reports: 01/19/2022  
Number of Days to Update: 82

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

### AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

### Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

### Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

### Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

### Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

### Daycare Centers: Child Care Provider List

Source: Department of Health

Telephone: 801-538-9299

**Flood Zone Data:** This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

### TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

### SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

### **FEMA FLOOD ZONE**

|   |                         |
|---|-------------------------|
| <u>Flood Plain Panel at Target Property</u> | <u>FEMA Source Type</u> |

| <u>Additional Panels in search area:</u>    | <u>FEMA Source Type</u> |
| 49035C0139E                                 | FEMA FIRM Flood data    |

### **NATIONAL WETLAND INVENTORY**

|                                    |  |
|------------------------------------|--|
| <u>NWI Quad at Target Property</u> | <u>NWI Electronic Data Coverage</u>            |
| SALT LAKE CITY NORTH               | YES - refer to the Overview Map and Detail Map |

### HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

|               |                 |                          |
|---------------|-----------------|--------------------------|
| <u>MAP ID</u> | <u>LOCATION</u> | <u>GENERAL DIRECTION</u> |
| Not Reported  | <u>FROM TP</u>  | <u>GROUNDWATER FLOW</u>  |

## **GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY**

### **GROUNDWATER FLOW VELOCITY INFORMATION**

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### **GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY**

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

#### Soil Map ID: 1

Soil Component Name: LELAND

Soil Surface Texture: clay loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 99 inches

| Soil Layer Information |           |           |                    |  |  |  |                      |

### Soil Map ID: 2

Soil Component Name: DUMPS

Soil Surface Texture: clay loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:  
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

### Soil Map ID: 3

Soil Component Name: DECKER

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Somewhat poorly drained

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 84 inches

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### Soil Map ID: 4

Soil Component Name: SALTAIR

Soil Surface Texture: silty clay loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 15 inches

| Soil Layer Information |           |           |                    |  |   |  |                    |

### Soil Map ID: 5

Soil Component Name: DECKER

Soil Surface Texture: loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 84 inches

### Soil Map ID: 6

Soil Component Name: WATER

Soil Surface Texture: loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class:  
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

### WELL SEARCH DISTANCE INFORMATION

## RADON

### AREA RADON INFORMATION

State Database: UT Radon

#### Radon Test Results

| Zipcode | Maximum | Average | Num Tests | Test Term  |
|---------|---------|---------|-----------|------------|
| 84104   | 10.8    | 3.6     | 7         | Long Term  |
| 84104   | 18.3    | 4.0     | 47        | Short Term |

Federal EPA Radon Zone for SALT LAKE County: 2

Note: Zone 1 indoor average level > 4 pCi/L.  
: Zone 2 indoor average level >= 2 pCi/L and <= 4 pCi/L.  
: Zone 3 indoor average level < 2 pCi/L.

---

Federal Area Radon Information for SALT LAKE COUNTY, UT

Number of sites tested: 52

| Area        | Average Activity | % <4 pCi/L | % 4-20 pCi/L | % >20 pCi/L |
|-------------|------------------|------------|--------------|-------------|
| Living Area | 1.670 pCi/L      | 83%        | 15%          | 2%          |
| Basement    | 2.960 pCi/L      | 56%        | 41%          | 4%          |

## **TOPOGRAPHIC INFORMATION**

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

## **HYDROLOGIC INFORMATION**

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Wetland Inventory

Source: Utah Geological Survey

Telephone: 801-537-3300

## **HYDROGEOLOGIC INFORMATION**

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## **GEOLOGIC INFORMATION**

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

### STATE RECORDS

#### Water Rights Database

Source: Department of Natural Resources, Division of Water Rights

Telephone: 801-538-7408

#### Division of Drinking Water Well Data

Source: Department of Environmental Quality

Telephone: 801-536-4200

## OTHER STATE DATABASE INFORMATION

#### Utah Oil, Gas and Mining Database

Source: Department of Natural Resources

Telephone: 801-538-5340

The Well Data file contains one record of basic information for each well in the Utah Division of Oil, Gas and Mining database.

### RADON

#### State Database: UT Radon

Source: Department of Environmental Quality

Telephone: 801-536-4250

Test Results by Zip Code

#### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

#### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRRA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.
