

All,

We continue to see operating issues in the Parking Structure. We have sent multiple emails (12/21/22 and 02/22/23) requesting operators do not block the drive lanes when loading and unloading passengers. This is our third reminder and final warning about Parking Structure Operations. We have witnessed several operators blocking the drive lanes while loading and unloading passengers. In addition, operators have been parking in the ADA stalls to either load and unload passengers, or go inside the terminal for Meet and Greet. Please only use designated stalls for parking, and please do not park in the ADA stalls unless you have a right to do so. Future occurrences will result in citation issuance. If citations are issued for blocking the drive lanes, a \$100 citation (16.60.190) will be issued to both the operator and the company (5.71.280). If citations are issued for ADA parking reasons (12.56.120), those will go to the operator, and carry a penalty of \$150.

If you have any questions pertaining to Parking Structure operations, please let us know.

Thank you
