

A friendly reminder to please not block traffic when picking up or dropping off customers in the garage. We have noticed operators are pulling up as close as they can to the doors into the Gateway (Garage to Terminal Entrance), and this is blocking traffic. In addition, several vehicles have been witnessed parking in ADA stalls without proper placards/plates. Please be aware of the traffic around you and try to minimize the impact on others while operating in the garage. In addition, parking in ADA stalls without placards/plates may result in a citation.

Thank you
