All,

The is a reminder to please use the “Drop and Go Zone” on Level 2 when performing non meet and greet operations in the garage. This area will accommodate (4) four vehicles and is intended for quick turnaround operations. If you are performing a meet and greet service, please continue to park in any open stall in the parking structure and enter the facility. As you already know, there are no time restrictions as you are paying to park. The “Drop and Go Zone” was created to eliminate vehicles blocking thru traffic and is located on the west side of the parking structure adjacent to the moving walkway.

As seen in Image 1, this area is not to be used for dropping off or picking up customers and shall only be used as a drive lane. Operators witnessed using this area for operations will be issued a citation. Please use the newly designated area near the moving walkway, and please follow the signage as seen in Images 2-4. If vehicles are witnessed parking in this area for longer than the designated 5 minutes, or leaving their vehicles unattended, operators will be cited.

The last photo (Image 5) shows the overhead view and the simplicity of the design. Please follow the ground markings when operating in the area. To access, enter from the south, and exit at the north end.

Thank you,

SLC Airport GT
